

# People Counter Sensor

**PX25A-PIR** is a compact wireless ceiling mount PIR (Pyroelectricity Infra Red) sensor. It has a built in adjustable high sensitivity PIR sensor, a sigfox transmitter and a primary battery. It comes with 2 functional options, movement counting and presence sensing. Typical usage for movement counting are detecting people going through a passage & motion detection for a room to indicate room occupancy activity.

**High performance**

**Low cost**

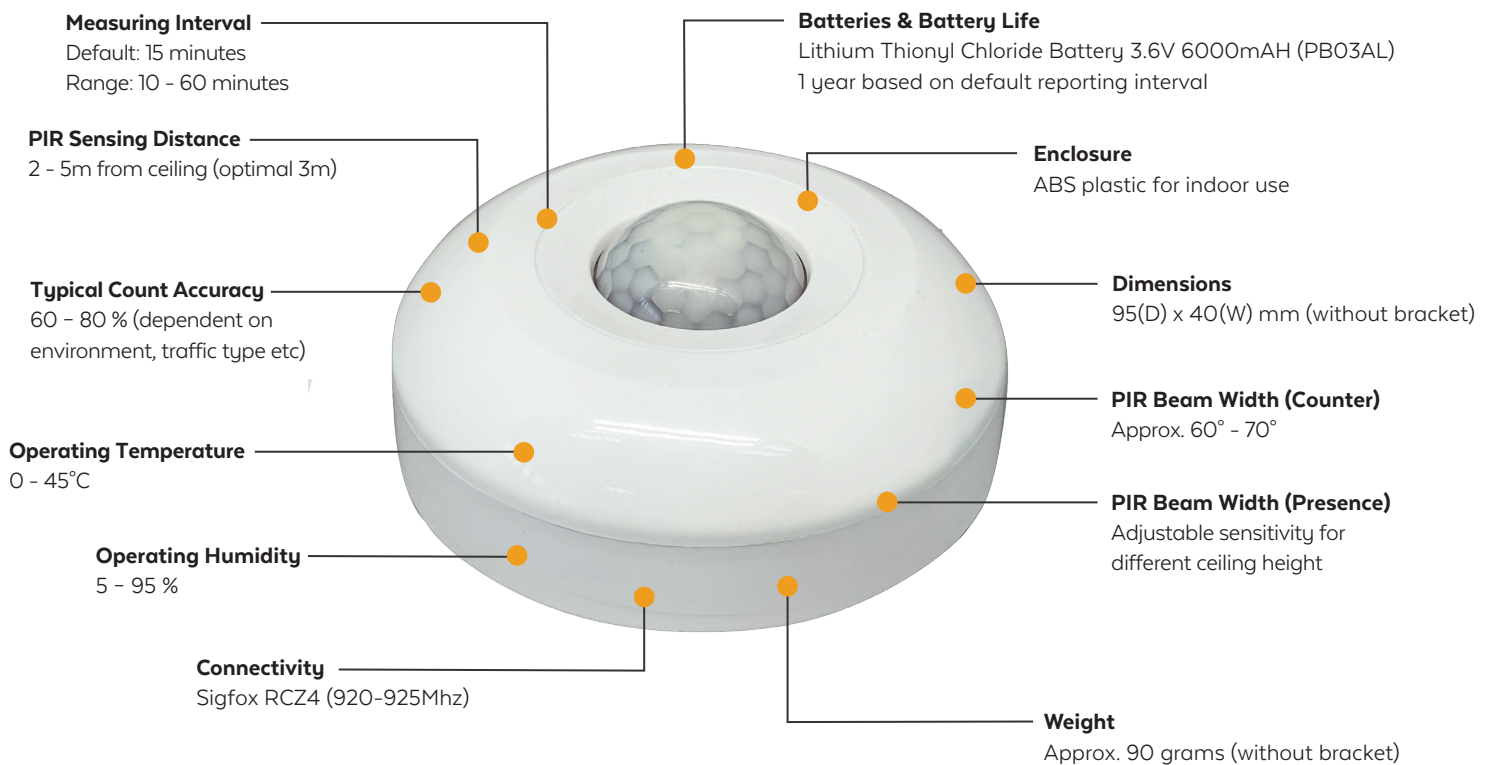

**Ultra-Long Battery Life**

**Small & Compact**

**Simple Installation**

## Applications

### Facility Management

Detect crowds in large spaces or intrusion in places with restricted access

### Elderly Assistance

Remotely detect elderly activities at home

### Workspace Management

Monitor desk occupancy in offices, schools or co-working spaces

The total solution also includes a dashboard to monitor all devices and collected data. For more info, reach out to us at [sgsales@unabiz.com](mailto:sgsales@unabiz.com).
